Source: The Foundation Center, 2007. Dollar figures in thousands; due to rounding, figures may not add up. Based on all grants of \$10,000 or more awarded by a national sample of 1,154 larger U.S. foundations (including 800 of the 1,000 largest ranked by total giving). For community foundations, only discretionary grants are included. Grants to individuals are not included in the file. Figures represent only grants awarded to groups that could be identified as serving specific populations or grants whose descriptions specified a benefit for a specific population. These figures do not reflect all giving benefiting these groups. In addition, grants may benefit multiple population groups, e.g., a grant for economically disadvantaged youth, and would therefore be counted more than once.

<sup>1</sup>Coding for these groups generally includes only "domestic" populations. Overseas grants are only coded for ethnic or racial minorities if they specifically mention a benefit for a particular minority group.
