SPOTLIGHT ON HEALTH GRANTMAKING IN CALIFORNIA

The Foundation Center’s mission is to strengthen the nonprofit sector by advancing knowledge about U.S. philanthropy. In this report, we shine a spotlight on health grantmaking in California. We hope this brief look at California grantmakers and recipients and those outside California that support the state’s health programs will help you gain insights about the state of health philanthropy in California.

This report includes statistical charts and tables based on the Center’s annual grants sample, a mini-directory of significant health funders in California, and a profile of the California Endowment’s new Center for Healthy Communities.

CALIFORNIA GRANTS SAMPLE

Each year the Foundation Center indexes all of the grants of $10,000 and more awarded by more than 1,000 of the nation’s largest foundations. Our most recent (2004) sample includes over 126,000 grants awarded by 1,172 U.S. foundations totaling $15.5 billion. Of the sampled foundations, 119 were based in California.

The charts on the right are based on the 96 California foundations in the 2004 sample that made health-related grants to California-based recipients. Their giving totaled $340 million. A mini-directory of selected California funders focused on health is supplemented by a table listing the top non-California foundations that also provide significant health funding in the state. A list of the top 15 health-related grant recipients in California from the entire 2004 grants sample rounds out the picture.

PRIMARY PURPOSE

Funding for General and Rehabilitative Health—which includes support for hospitals and in-patient care, outpatient clinics and care, public health, reproductive health, and health care financing and policy, among other purposes—accounted for 64% of all California giving for health in the state. Within that category, hospital and medical care was equal with public health in capturing the largest share of grant dollars, followed by health care financing, and reproductive health care.

TARGET POPULATION

Among those specified, economically disadvantaged populations benefited from nearly half of California health grant dollars. Ethnic or racial minorities and children and youth followed with 38% and 36%, respectively.
MINI-DIRECTORY OF CALIFORNIA FOUNDATIONS THAT FUND HEALTH PROGRAMS

The following private and community foundations were identified in the Foundation Center’s 2004 grants sample as awarding the greatest amount of health grant dollars to California recipients. For most of the funders in this directory, health is just one among many areas of interest for their grantmaking. The descriptions provided here attempt to capture just their health interests, but should not be taken as an indication that they devote their grantmaking exclusively to health.

**The Ahmanson Foundation**
Beverly Hills
Web: theahmansonfoundation.org
Description: Emphasis on medicine and health, and a broad range of human service programs in Los Angeles County
Selected Grants:
- $500,000 to Pasadena Hospital Association, for reconfiguration and expansion of Emergency Department
- $500,000 to Painted Turtle Gang Camp Foundation, for construction of camper cabins for children with life-threatening illnesses
- $253,400 to Saint John’s Well Child and Family Center, for renovation of new clinic facility on Hoover Street

**California Community Foundation**
Los Angeles
Web: calfund.org
Description: Support for enhanced access to primary health care for the working poor and those living in poverty
Selected Grants:
- $3,089,082 to Little Company of Mary Hospital, for establishment of radiology and bilingual services
- $170,000 to Asian Pacific Health Care Venture, for chronic care program for diabetic Thai and Filipino Angelenos
- $80,000 to Church of Our Saviour, Cleaver Family Wellness Clinic, for primary care services and health education programs for low-income women, particularly Latinas

Center for Healthy Communities
1000 N. Alameda Street
Los Angeles, California 90012
www.calendow.org/chc/

“Real social change depends on coalitions forming across sectors, disciplines, systems, and cultures. By combining much-needed resources into one accessible location, the Center for Healthy Communities aims to become the premier venue for activities addressing California’s health challenges, and a launch pad for collaborative action.”

— Gwen Walden, Director, Center for Healthy Communities

Community empowerment to improve health and health care for all Californians is the guiding vision of the Center for Healthy Communities. The Center seeks to mobilize civic leaders, health providers, advocates, and policymakers in the quest for solutions to critical health and mental health issues.

Six years in the making, the California Endowment’s newly opened Center for Healthy Communities was created as a direct result of feedback from dozens of community groups and local leaders who were asked about their most pressing needs. Through grantmaking, conferences, convenings, trainings, seminars, and publications, the Center is dedicated to supporting the regional and statewide community of health advocates, policymakers, and grassroots leaders working to improve the health and health status of Californians. A place to collaborate, learn, and exchange ideas about health and health policy research and practice, the Center features a newly constructed conference venue available for use by qualified nonprofits and a variety of services and training programs both on-site and throughout the state.
